

We can help with your business insurance

'WA Business Insurance' can assist with all commercial and domestic insurance. We specialise in assisting small and medium sized businesses with their insurance needs, particularly cafe and restaurants, retail, trades, wholesalers and manufacturing companies.

We offer annual product reviews, risk business assessments and on-going management in the event of insurance claims. We offer a personalised service with a dedicated account manager to obtain your quote, make adjustments and manage claims.

We understand that insurance is an important part of your business. We understand the different risks businesses face as they grow, diversify, and change management or corporate structure. We also understand the frustration of changing regulation and we help small business navigate insurance requirements. As a result, we have developed a strong understanding of insurance products and processes to help combat these risks.
